

Compatible with
Magento 1.2.+

This extension enables you to upload files that would be available for customers' download free of charge. It's useful for providing manuals, drivers, promotional materials, samples, flyers, etc.

With this mod you can:

- Add downloadable files to any product type.
- Upload different file formats.
- Upload an unlimited quantity of downloadable files for each product.
- Assign an individual title for the block with downloadable files for each product.

Useful Downloads extension for Magento.

Useful Downloads

Title: Useful Downloads

Title *	File	Sort Order
Driver	<input type="radio"/> File: <input type="button" value="..."/>	<input type="text"/>
	<input checked="" type="radio"/> URL: <input type="text" value="http://example.com/files/driver.zip"/>	<input type="text"/>

2. You can set individual block title for each product.

1. For each product type we added "Useful Downloads" subpage (for downloadable products as well, it's up to you whether to use it or not). At this subpage you can upload drivers, manuals, brochures and other files for your customers.

3. To upload more than one file click "Add New Row" button.

This is how the block with downloads looks on a product page. If you don't add any downloadable files for a product, the block will not be displayed.

How to change location of the Useful Downloads block

1. Set “Use custom placement for links block” (at System >> Configuration >> Catalog >> Useful Downloads Options) to “Yes”.

2. Insert the following code in the appropriate place of the product view template:

```
<?php echo $this->getAitfilesLinks() ?>
```

Thank you for your interest in AITOC's extension for Magento.
