## Extension configuration

By default, the extension allows you to filter & sort orders both by SKU and by Product Name. To use only one of these parameters, open the `app\code\local\AdjustWare\Orderproducts\etc\config.xml` file and find these lines:

```
<show_sku>1</show_sku>  
<show_product>1</show_product>  
<prev>real_order_id</prev>
```

To disable the SKU filter, change

```
<show_sku>1</show_sku> to <show_sku>0</show_sku>.
```

To disable Product filter, change

```
<show_product>1</show_product> to <show_product>0</show_product>.
```

# 3. Using the filter on the Orders grid

## Orders

Page 1 of 4 pages | View 20 per page

Now you can filter and sort orders by Product Name and SKU.

Select Visible | Unselect Visible | 0 items selected
